ARRANGEMENTS FOR DISTRICT MEETING

The Woman's Missionary Societies Of The Owensboro District Will Meet Here Next Wednesday And Thursday. Homes In This City Will Graciously Receive The Delegates.

ADDRESSES FOR TWO NIGHTS

Next Wednesday will be the opening day of the meeting of the Woman's Missionary Societies of the Owensboro District at the Methodist church in this city. Names of the delegates who will be present are already being received. Mrs. B. M. Currie, secretary of the Central City Society, writes: "We will have one delegate and possibly two, Mrs. Grabtree and Mrs. Dave Solsburg from our society to the District meeting there. They expect to arrive there before noon Wednesday. Wish I could come, but I have two little fellows in school, you know, so can't leave them. Hope you will have a fine meeting."

At least, twelve homes of the church have already been opened for entertaining the delegates and more will be this week and next as soon as arrangements can be made by the house keepers. All those interested in the services are requested to be at the church next Wednesday morning not later than 9:30 o'clock to receive the guests and attend the opening services.

Father Brey Here.

Father Celestine Brey arrived from Louisville Monday morning to visit Father Henry. He has a wealth of friends in Cloverport whose hearts were made glad to see him. This week Forty Hours Devotion of prayer is being observed at St. Rose with a large number of members attending.

Enlarging Home.

Conrad Sippel is adding a second story of four rooms to his residence on the hill. The view from his home of the river and the hills is something wonderful, and his home, when completed, will be beautiful.

At Rose Hill Sunday.

Mr. and Mrs. Robert Pierce, of West Point, Fred Pierce, of Louisville, and Vivian Pierce arrived home from the South Sunday, and were guests of their parents, Mr. and Mrs. Bob Pierce at Rose Hill.

Visit Their Father Who Is Ninety-Six Years Old.

That he must have kept the fifth commandment must be true of Mr. Phillip Webb as the fact is verified in his age, ninety-six years. His home is in Roanoke, Va., and his son, J. W. Webb, of Garfield, and his daughter, Mrs. Mary Morelock, of Owensboro, have just returned home from a visit to him. Their venerable father has good health, though he has not walked for two years.

Railroad Money To Irvington.

Irvington is also enjoying being fortunate enough to have a big pay day. Messrs Emmett and Eddie Riggs, of the L. & St. L. R. R., came to Irvington last week from the General offices and paid out a nice bunch of money for the Company. It was as good to Irvington as "pay day" is to Cloverport.

At C. H. S. Saturday.

The basket ball game at C. H. S. Saturday between the Jr. O. U. A. M. and C. H. S. boys, resulted in a score of 15 to 6 in favor of the C. H. S. Prof. T. B. Culton was referee. The Jr. O. U. A. M. played a good game, and the C. H. S. boys were at their best. The high school girls were there to root and encourage the boys with school yells. The lineup was as follows:

We hereby wish to express our gratitude to the many friends who so kindly assisted us in the sickness and death of our wife and daughter.—Forest Beauchamp, Mrs. L. Robinson.

BIG GUSHER STRUCK.

Four Hundred Barrel Well Comes in at Hartford—May Prove the Greatest Producer in State.

Hartford, Ky., Oct. 19.—The West Kentucky Oil Company of this place, brought in well No. 2, a 400-barrel gusher this afternoon. It is believed that this well will prove the largest producer in Kentucky. The rush of oil was so great that scores of men with picks were pressed into service to throw up embankments and dig a ditch to drive the flow in the desired direction.

Well No. 2 is located on a farm five miles north of Hartford. Oil was struck at a depth of 1,300 feet. The oil has already been subjected to various approved tests and shows 23 per cent. gasoline. Well No. 1, was brought in about two months ago, and is producing fifty barrels daily. Well No. 3, located in the same locality, is expected to be brought in within ten days.

The West Kentucky Oil Company, which is composed of Louisville and Hartford capitalists, has tanks at this place, and is making arrangements to build a pipe line to the L and N. tracks at once, having made contracts with a number of purchasers.

Among the stockholders in the West Kentucky Oil Company are I. P. Barnard, Louisville, and the following citizens of Hartford: Rowland Holbroke, J. W. Ford, John T. Moore, R. E. Lee Simmerman and J. S. Glass.

My Friend

"I am the best pal that I ever had
I like to sit and tell myself
Things confidentially.

"I often sit and ask me
If I should not or I should.
And I find that my advice to me
Is always pretty good.

"I never got acquainted with
Myself till here of late
And I find myself a bully chum
I treat me simply great.

"I talk with me and walk with me
And show me right and wrong.
I never knew how well myself
And me could get along.

"I never try to cheat me
I'm as truthful as can be.
No matter what may come and go
I'm on the square with me.

"It's great to know yourself and have
A pal that's all your own.
To be such company for yourself
You're never left alone.

"You'll try to dodge the masses
And you'll find a crowd's a joke.
If you only treat yourself as well
As you treat other folk.

"I've made a study of myself
Compared me with a lot.
And I've finally concluded
I'm the best friend I've got.

"Just get together with yourself
And trust yourself with you.
And you'll be surprised how well yourself
Will like you if you do."

DR. MOREMEN WILL NOT LEAVE IRVINGTON

Unfortunate Report Started-- Making Plans For a Great Future in the Town--Will Take a Post Graduate Course in Chicago Next Year.

SUCCESS LIES IN IRVINGTON.

In a letter to The Breckenridge News Dr. L. B. Moremen writes: "Please state in the paper that I am not going to leave Irvington and convince some that I am in earnest about saying it."

The report that Dr. Moremen would leave Irvington must have had its origin from the fact that he is planning to leave the first of the year for Chicago to take a post graduate course in medicine. Dr. Moremen had no thought of living any place except Irvington, instead he is looking forward to a splendid future there. He has a large practice, excellent business interests and valuable friends—enough to keep a man in any town.

Dr. Moremen is not a man of one view, of one book, but he takes hold of every opportunity to enlarge his world. He believes that Irvington possesses the secrets of success and satisfaction as much so, if not more, than any town, and in Irvington he will stay.

The people of Irvington will be relieved to know that the report is false. The town and community appreciate Dr. Moremen—they depend on him as a physician, a citizen and a leader in civic enterprises.

In The Circuit Court.

In the case of McKinley Lyons vs the L. & St. L. Railroad—judgment for plaintiff \$3,500.

D. W. Henry vs the L. & St. L. for \$5,000 damages peremptory instructions for the defendants and petition dismissed.

In the case of Russell Hutchison & Co. vs Pete Sheeran & Co., compromised and action dismissed.

The grand jury returned 21 indictments.

The county jail and other property belonging to the county reported in good order, clean and sanitary.

The court will adjourn today.

Big Demand For Lime As Fertilizer.

The Webster Stone Co., Irvington, are shipping large quantities of their Ground Lime Stone used for fertilizer. They have orders for over 400 tons of this stone. Farmers all along the main line of the Henderson Route and on the Branch are using it. It is just what the land needs. It is cheap and gives good results, so say those who are using it. This company is also shipping from 15 to 20 cars of crushed rock per day.

BACKACHE NOT A DISEASE

But a Symptom, a Danger Signal Which Every Woman Should Heed.

Backache is a symptom of organic weakness or derangement. If you have backache don't neglect it. To get permanent relief you must reach the root of the trouble. Read about Mrs. Woodall's experience.

Morton's Gap, Kentucky. -- "I suffered two years with female disorders, my health was very bad and I had a continual backache which was simply awful. I could not stand on my feet long enough to cook a man's victuals without my back nearly killing me, and I would have such dragging sensations I could hardly bear it. I had soreness in each side, could not stand tight clothing, and was irregular. I was completely run down. On advice I took Lydia E. Pinkham's Vegetable Compound and am enjoying good health. It is now more than two years and I have not had an ache or pain since. I do all my own work, washing and everything, and never have backache any more. I think your medicine is grand and I praise it to all my neighbors. If you think my testimony will help others you may publish it." -- Mrs. OLLIE WOODALL, Morton's Gap, Kentucky.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

JUST FOR TODAY

Lord, for tomorrow and its needs
I do not pray,
Keep me, my God, from stain of sin
Just for today.
Help me to labor earnestly
And duly pray;
Let me be kind in word and deed,
Father, today.

Let me no wrong or idle word
Unthinking say;
Set then a seal upon my lips
Through all today,
Let me in season, Lord, be grave.
In season gay;
Let me be faithful to thy grace
Dear Lord, today.

And if, today, this life of mine
Should ebb away,
Give me thy sacrament divine,
Father, today.
So for tomorrow and its needs
I do not pray;
Still keep me, guide me, love me, Lord
Through each today.

UNMASKING THE TARIFF DELUSION

Franklin Pierce Shows That Labor Is Not Benefited by Unjust Tax.

MANUFACTURER KEEPS PROFIT

Proof of Democratic Platform's Soundness Cited in Reports of Wage Investigations.

By FRANKLIN PIERCE.

For a hundred years of our history the manufacturers, believing that they received a benefit from the protective tariffs, have ingeniously devised plausible pretexts for imposing increased prices upon the necessities of life. At first they said that industry in our country was in its infancy and needed protection. When those industries had become strong and needed no aid the manufacturers invented the theory that the foreigner paid the duty. This theory was exploded, and they declared that cheap clothing meant cheap men and was not a blessing.

Driven from every one of these indefensible positions, their final and only argument left today is that the tariff is imposed upon foreign imports to enable the manufacturer to increase his profits and pay higher wages.

The Democratic platform declares that:

"In the most highly protected industries, such as cotton and wool, steel and iron, the wages of the laborers are the lowest paid in any of our industries."

Wages in Cotton Industry.

Under the existing Payne-Aldrich tariff law actual imports of cotton cloth paid in 1910 average duties of 55.4 per cent.

In 1905, when work and wage conditions in the cotton industry were exceptionally good, the wages of 202,211 cotton mill operatives in the United States—men, women and children—averaged only \$6.47 a week. The average wage for men was but \$7.71 a week, for women \$6.30 and for children, \$3.21.

As to the profits, seventeen leading cotton mills, with total capitalization of \$25,110,000 and total surplus of \$21,303,501, paid in nine years dividends averaging 22 per cent.

The cotton manufacturers turned out in 1905 \$42,451,218 worth of goods and paid in wages therefor \$94,337,635, or 21 per cent of the value of the finished product.

Extortion of Wool Tariff.

Outside of the duties on two or three commodities of comparatively little importance, the duties on woolen cloth are the highest of any in the tariff schedules. According to Senator Reed Smoot, owner of a woolen mill at Provo, Utah, and chairman of the finance committee in charge of tariff legislation in the senate, wearing apparel valued at 30 cents a pound now pays 206 2-3 per cent duty.

This and other correspondingly high duties on the manufactures of wool are made to enable the manufacturer to pay his labor an increased wage over those of foreign countries. But the duty on woolen goods is nearly five times the entire labor cost, while the American manufacturers in 1905 paid in wages only 18 per cent of the total value of their production.

At Lawrence in this most highly protected industry the laborers were obliged to strike even for a living wage. Thousands of adult males were receiving only from \$6 to \$9 a week and many only \$5 to \$6 a week. As a result of the strike the American Woolen company gave its employees slight increases in wages.

The wool tariff bill vetoed by President Taft reduced the duties on raw wool from 42.20 to 29 per cent and on manufactures of wool from 57.65 to 48.36 per cent. Mr. Taft said he vetoed it because the proposed rates did not comply with the findings of the tariff board. Senator La Follette contradicted the president, saying that the proposed rates varied from 1 per cent lower to 11.6 higher than the tariff board's findings justified.

Low Wages in Steel.

Manufacturers of iron and steel in 1905 paid in wages only 15 per cent of the total value of their production, while the duty then would average about 45 to 47 per cent, and on all metals it now averages 34.51 per cent.

American wages are really the cheapest wages in the world when you take into account the amount of production per man. An illustration of this appears in the Stanley report, investigating the steel trust, as follows:

"The labor cost of producing pig iron in Pennsylvania fell from \$1.25 a ton in 1902 to 82 cents a ton in 1909, yet the realized value of the pig iron output was \$15.64 in 1902, whereas it was \$17.44 in 1909. In other words, wage-workers in 1902 got \$1.25 for producing only \$15.64 worth of pig iron and in 1909 only 82 cents for producing \$17.44 worth."

While thus treating labor the industrial combinations that have grown up under the protection of the tariff have fixed the prices of commodities at the highest point the home market would stand.

When will the laboring men of the country cast off this delusion that the tariff is for their benefit and with their votes strike down this monstrous injustice?

TEACHERS MEET

Twenty-Two Present At The Association Here Saturday. Instructive Program And Music. Few Patrons Present.

The Second District Teacher's Association met at the Cloverport Graded and High School building Saturday, Oct. 19. Twenty-two teachers were present and entered into the discussions. The music by C. H. S. girls assisted by the Misses May was appreciated and enjoyed by all present. The teachers expressed only one regret and that of seeing so few patrons of the Cloverport school present.

The teachers present were: James McGovern, Ivan Jolly, Myra Basham, Ida Marr, Julia Wroe, Margaret Wroe, Katharine Wroe, J. R. Laslie, Miss Ora Hendrick, Prof. Rufus McCoy, Prof. T. B. Culton, Mrs. Culton, Supt. Andrew Driskell, Mrs. Driskell, Miss Leonora McGavock, Miss Beulah Rowland, S. M. Rowland, Miss Zelma Lay and Miss Shellie Laslie.

Sick headache is caused by a disordered stomach. Take Chamberlain's Tablets and correct that and the headaches will disappear. For sale by all dealers.

Colors of Sea Water.

It has been proved that the blueness of sea water is in constant ratio to its saltness. In the tropics the tremendous evaporation induced by the blazing sun causes the water to be much more salt than it is in higher latitudes.

For about 30 degrees both north and south of the equator the waters of the world's oceans are of an exquisite azure. Beyond these latitudes the blue fades and changes to green, and in the Arctic and Antarctic oceans the greens are almost as vivid as the tropical blues.

China's Yellow sea is usually supposed to owe its origin to the flood of muddy water which its great river pours into it. But here, again, modern science has proved that living organisms are responsible for its peculiar tint.

Interesting Search.

William Dana Orcutt, whose new novel, "The Moth," has just been published by the Harpers, is noted for his extreme diligence in verifying all historical facts that appear in his novels. When writing one of his earlier novels, "The Spell," he made a special trip to Florence in order to verify certain allusions and locations. One of the first pilgrimages was to San Domenico to find the ancient inscription upon the wall, which Helen Armstrong points out to her husband in the first chapter. Says the author, "I had never been able to discover where I obtained this data, so was particularly anxious to verify it. One morning, accompanied by Mrs. Orcutt, I set out on what seemed a hopeless quest. We located the old Etruscan wall, with its curious marks, but no legends. Finally we came to some flaring posters announcing an auction sale, and beneath these, when pulled aside, we found the Latin words, cut deep in the stone."

Fame.

Great minds had rather deserve contemporaneous applause, without obtaining it, than obtain without deserving it; if it follow them, it is well; but they will not deviate to follow it. With inferior minds the reverse is observable; so that they can command the flattery of knaves while living, they care not for the execrations of honest men when dead.

Milton neither aspired to present fame, nor even expected it; but (to use his own words) his "high ambition was to leave something so written to after ages, that they should not willingly let it die." And Cato finely observed that he would much rather that posterity should inquire why no statues were erected to him, than why they were.

CAN'T DENY IT

If This Had Happened Elsewhere
Instead Of Cloverport You
Might Doubt It.

The average man is a doubter. This is not surprising—the public have been humbugged so frequently they are skeptical. Proof, like the following will stand investigation. It cannot be disputed.

J. C. Weatherholt, grocer, Cloverport, Ky., says: "Two years ago I had little idea that I would ever be well again, in fact, I had settled up my affairs, believing that it would be impossible for me to last a great while longer. The pain in my back was terrible, especially when I stooped and it seemed as if someone had run a knife into me. My heart action was irregular. I became dizzy and often had to catch hold of something to keep from falling. My knee joints were swollen twice their normal size and I had lost weight until I was a mere skeleton. The kidney secretions contained sediment and the passages were painful. Doctors' medicine did me no good, neither did the so-called kidney cures I took. A friend had been cured by Doan's Kidney Pills and on his advice, I decided to give this remedy a trial, procuring my supply at Fisher's Drug Store. I was surprised and delighted with the results of its use and I continued taking them until I was cured."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

LINCOLN INSTITUTE FOR OUR COLORED PEOPLE.

Lincoln Institute, a college for Kentucky's colored young men and women, was dedicated at Simpsonville last Wednesday. A distinguished speaker at the dedication was Miss Mary Helm, of Elizabethtown, who has never tired of writing and working for the negro in Kentucky. She directed her address especially to the girls and women, saying: "You must be trained as Christian women in industry, truthfulness and honesty," and urged the importance of domestic training for the students. There is nothing more splendid than to see a woman well-trained for service in homemaking, and the opportunities for this efficiency have been opened to the colored women for years, but they were never taught to see the value of working in a well-managed and equipped home. Now that the advantages of Lincoln Institute have been pointed out and exalted in the beginning, the race for which it has been built, will, no doubt, appreciate it to the fullest.

In less than six years \$400,000 was raised to build this worthy college. Mr. Andrew Carnegie gave \$200,000, and without anyone asking her, Mrs. Russell Sage gave \$25,000. An unknown friend gave \$50,000, and \$30,000 was raised in Kentucky. Dr. William Frost, president of Berea College, said: "It took a year of time and 10,000 cold refusals before we found about 1,000 white people in the State who would contribute, and among the colored people were enemies who followed us around urging people not to subscribe."

May long live Lincoln Institute, and bring to our colored people the satisfaction of knowledge and the happiness of understanding.

Cloverport is the best town between Louisville and Henderson. It does more business in proportion to its size than Owensboro. For the last three weeks the lumber men have been busy from morning until night receiving timber. The freight depot is always crowded with traffic, and all the other industries in town have been running at full capacity. Much improvement in the way of remodeling and enlarging homes has been going on all summer. Cloverport is anything but a dead town.

Less than two weeks remain before the election. At present there is every indication of Democratic success, but things can happen in that short time to turn the tide. We do not believe it possible that anything can turn the tide from Wilson, but we should take nothing for granted. Every Democrat who loves his country and his party should get on the firing line and remain on duty until the close of the polls November 5th.

Over 3,000,000 foreign-born voters will be qualified to vote in the November elections. The largest proportion of them are of the Latin races. This is a great privilege that our country gives, and it is gratifying to see the people who have come from across the seas, take a hand in the welfare of our government.

Vice-Chairman S. W. Hager is putting in his entire time at the Democratic Campaign Headquarters and his experience and successful conduct of other campaigns make his suggestions and assistance peculiarly profitable. He is an original Wilson man and his enthusiasm for his favorite is contagious.

Nearly 20,000 newspapers have complied with the provisions of the postoffice appropriation bill requiring newspapers, magazines and periodicals to publish the names of the owners and the size of their circulation. However, we notice several of the publishers leave out the required statement about the circulation.

WHY NOT ELECT WOODROW WILSON

Chicago Post, Influential Republican Paper, Asks Its Readers a Leading Question.

FRAUDS OF PRESENT REGIME.

Says the Tariff Has Been Too High For a Generation and Must Be Lowered.

The Chicago Post, an influential independent Republican newspaper, propounds this question to Republicans:

"Why not Wilson?"

"This question is addressed particularly to Republicans."

"Governor Wilson suits the Democrats down to the ground, suits all Democrats who are worthy to be called Democrats. But in an emergency like this, why should not Wilson suit a large part of the Republicans as well?"

"Why not Wilson?"

"Governor Wilson is a thoroughbred American gentleman, not only in the accident of birth, but in his every ideal, impulse and principle. That should be the first requirement of every presidential candidate."

"Governor Wilson is a tried and trustworthy executive. His brilliant record as governor of New Jersey proves that."

"Governor Wilson is an eminently sane and sensible man. He is an eminently honorable man. He has dignified every place which he has held. He has performed a splendid public service by lifting the present campaign out of the mire of mudslinging with which Roosevelt began it."

"In every personal characteristic, Governor Wilson is equipped to be any man's president, without regard to whether that man is a Democrat or a Republican. What, then, of his political qualifications?"

"Governor Wilson is and always has been a sensible Democrat, but he is not and never has been a silly, violent partisan."

"Governor Wilson stands for honesty and efficiency in federal administration. So do all save those who profit by graft and inefficiency."

"Governor Wilson stands for the curbing of trusts and monopolies. So do all, except monopolists and their defender, Theodore Roosevelt."

"Governor Wilson stands for a prompt and steady downward revision of the tariff. So do nine-tenths of the people of the United States."

"Governor Wilson believes in a more radical tariff revision than do a large number of the rank and file of Republicans. But Governor Wilson is the only candidate who if elected will permit the revision of the tariff at all."

"The tariff has been too high for a generation. Is it not better to take a chance at getting it too low—according to Republican standards—than to let the known friends of the present regime continue for another four years to rob the public?"

"Why not Wilson? He will give an honest, a dignified, a capable administration. He will respect the constitution. He will see that the tariff is revised downward. He will curb trusts. He will serve the people."

"Why not Wilson?"

FACTS WORTH REMEMBERING.

John D. Archbold, for the Standard Oil company, gave \$100,000 to Roosevelt's campaign fund in 1904, but refused to "come across" with \$150,000 more, which was demanded.

J. P. Morgan of the steel trust and other interests gave the Roosevelt fund in the same year \$100,000, and did give up \$50,000 more.

Habits of the Democracy.

Arthur I. Vorys, a regular and optimistic Republican, was voicing his opinion that in the next election the Democrats would repeat their many former experiences and bury their hopes at the polls. It reminded him of the experience of the middle-aged woman who went into a shop, and, without hesitation, made straight for the cinch counter. The girl who handled this funeral material was extremely affable.

"We have a large stock of crapes," she explained. "Let me show you some new French goods, very popular at this time for every kind of mourning, and designed to express every degree of grief. If you will tell me for whom you are in mourning, I can fix you out in exactly the right thing."

"Husband," replied the customer briefly.

"In that case," said the girl, graciously, "I can tell you just what—"

"Young lady," interrupted the older woman angrily. "You needn't bother yourself. This is the fourth husband I've buried, and I know all about it."—The Popular Magazine.

When the Small Boy Talks.

One day recently a coterie of young women in West Philadelphia completed plans for a moonlight excursion on the river, and when the evening of the trip arrived it was noticed that one of the most charming members of the party wore a shawl about her shoulders. One of her companions wondered at this and to her query as to whether the wearer was afraid of taking cold received a negative reply. Another suggested that possibly she had malaria. This was also emphatically denied. At this juncture the irrepressible small brother of the shawl-wearing young woman volunteered to explain matters, and despite his sister's vehement command to keep silent, said: "The reason sis wears that shawl is so that when she is on the boat Bob can put his arm under it and hug her, and she thinks nobody can see through the game."

YOUR CHILD'S FUTURE

What have you done, or have you done ANYTHING to insure to your child a successful future?

One of the greatest lessons you can teach him is to realize the value of money. Start a bank account here in his name and teach him to save his pennies, nickles and dimes; inculcate in him the invaluable habit of thrift; it will give him self respect and make others respect him. It will enable him, when he enters the business world, to be in a position to take advantage of good business and investment opportunities. CHAPTER VI.

In the office, smoking one of Mine Host's best cigars, his dignity outraged, sat the sheriff, waiting.

Mayor Bedight walked up the hotel stairs, oblivious to his pending fate. Suddenly a door opened and a head appeared, a blonde head, a piquant head, a head to catch the fancy of an artist.

"Shh!" said the owner of the pretty profile.

Bedight stopped, looking around cautiously.

"Hurry!" commanded the girl, holding open the door of her room.

His Honor, the Mayor, hesitated for a moment—and then, throwing conventionality to the winds, bolted through. The girl turned the key in the lock and faced him accusingly.

"Well of all the blundering bouncers! Do you know the sheriff has been hanging around here all afternoon waiting to arrest you?"

The mayor looked brazenly at the girl.

"I expected as much," he said, carelessly.

"What have you been doing now?" she demanded, giving him a severe reprimand from two otherwise kindly hazel eyes.

"Oh, chuck the attitude, Bess," growled the mayor, disgustedly. "That little imp of a Mabel Arney insisted on riding the black saddle. He ran away with her and in trying to catch the minx, I collided with a baby carriage and spilled the baby's milk. That's all. The confounded natives are always ready to arrest a summer resortor, and believing the peace and the dignity of the village had been shattered, they threw us in jail. We broke out, sullenly. 'Do you blame us?'

Before she could reply there was a knock on the door.

The girl's face went white.

"I—I'm afraid somebody saw you come in here!" she whispered.

"Nonsense," he breathed. "Here

Margaret Farnsworth.

"I'll slip under the bed. Go to the door."

In a twinkling the mayor was safely out of sight. The girl opened the door.

"Oh, hello, Jackie," she cried, in a relieved voice. "Come in."

"Bess, we're in a terrible pickle," sobbed Miss Vining. "That horrid man took Mabel Arney to Lakeville this morning and got her arrested. The sheriff insists she must be in the hotel and I've promised to bring the entire crowd out on the veranda for inspection. Mabel is frightened almost to death. Bess," dramatically, "we've got to dress her so the officer won't know her. Have you a switch of that flaxen hair of yours? I've got Mae Andrews' puffs. They'll match yours. We'll cover Mabel's black tangle until she looks like an albino. Here she is now," as the rustle of skirts proclaimed a new arrival.

The mayor lay on his back, facing the mattress.

"Where's that white princess of yours?" demanded Jackie. "She wore brown today. We'll have to take some tucks in it," going to the closet and helping herself.

"Here, Mabel, get into this, and live."

"Oh, not here!" protested Bess Winters, snatching the dress from Miss Vining's hands.

The judge looked at Bess blankly.

"Why not?"

"Be—because!" shrilled Bess. "I'm afraid. Slip into your room, that's a dear, and I'll bring the switch in at once."

"Oh, who's afraid?" gurgled Mabel, reaching for the gown.

"Step into the closet," implored Miss Winters. "Somebody might come."

"Bess, you're an awful coward," anathematized the judge, sternly.

The man under the bed heard the closet door close and waited. There didn't seem to be anything else to do.

With hysterical laughter the changing of blackhaired Mabel into a ravishing blonde proceeded rapidly.

"There!" exclaimed Miss Vining triumphantly, "the sheriff will never know her in the world. Come on."

Mayor Bedight heard the door close. Rolling from under the bed, he locked the door and sat down to await developments. Half an hour later somebody knocked at the door. The mayor waited.

"Walter!" whispered an excited voice. "Open the door. It is I—Bess."

"Come in," replied the mayor, turning the key.

"We fooled him!" she cried, radiantly. "He couldn't find his prisoner. Mine Host told him there were but ten young ladies—and he went away bewildered—but he's coming back tomorrow to watch for you."

The man shrugged his shoulders.

"Bess, you scoot out and discover what Harriet Brooks—consulting his list—"would like to have me do to-morrow and whatever it is we start at five in the morning."

The girl hurried away.

The mayor seated himself at a small desk and began to write. He was still at it when Bess returned.

"She has discovered an Indian mound on Glen Island and she wants you to go with her and open it. I have arranged to have her meet you at the bathing beach at sun-up."

The mayor seethed. He was not fond of grave-digging.

"Thank you, Bess," he said finally. "And now if you don't mind, I want to write a while."

"Very well, Walter," she consented, taking up a magazine.

For an hour neither spoke. Then the man laid down his pen and, looking at the sand:

"Bess, I want to know where Jackie Vining keeps that confounded anti-suffrage bill of mine."

"I refuse to enlighten you," sniffed the girl determinedly.

"Bess, you've got to tell me. I must get out of this confounded hole. My campaign opens on the following Saturday and I must be there. I wouldn't mind serving out my sentence but these outraged natives have huddled in on the game and they'll have me in jail inside of a week, as sure as Fate. You wouldn't want me to lose my election, Bess?" looking at her with appealing eyes.

"Walter, it is downright mean of you to even think of introducing a bill such as you have prepared. You deserve to lose—but I'm willing," condescendingly, "to do what I can for you. The bill—your bill—is in the personal possession of Judge Vining. She—in fact, she wears it inside her shirt-

walst to avoid losing it," blushing.

"Now I hope you are satisfied—and you may go. The sheriff has disappeared for the night. You can safely occupy your apartment."

"You're a good sport," said the mayor, patting the girl tenderly on the cheek—and passed out.

CHAPTER VII.

"There is the mound," advised Harriet Brooks on Wednesday morning, pointing to a rounded heap of earth just beyond the shade of a bur-oak a half mile inland from Sylvan Lake on Glen Isle.

Mayor Bedight took off his coat ruefully. Being prisoner to a prematurely gray-haired young lady with a clear, rosy complexion and a sweet, winsome manner was not so bad—but to be told to dig like a terrier in the rough soil was a horse of another color. But the mayor was game.

Grasping a spade, he set to work diligently. It was a warm morning and the perspiration began to ooze from his heated body.

"Come and sit in the shade a while," invited the girl, thoughtfully. "We have all day to ourselves—and the skeletons will not run away."

Bedight obeyed gratefully, throwing himself at the woman's feet in the cool shadows of the oak.

"I'm awfully interested in ancient and medieval things," she explained, smiling down at him over her hook.

"Once when I was in Iowa I met a man who was engaged in collecting curios—and he found a real mound-builder skeleton along the Cedar river while I was there. What if this should turn out to be something like that?" hopefully.

"Pardon me," said the mayor, boldly, "but a nice girl like yourself should not be so interested in dead ones—especially when the woods are full of live ones."

The girl's face flushed, the red against her white hair making her very attractive in the eyes of the man on the sand.

"The dead ones," she said slowly, "never stay out late nights, never tyrannize, never take everything for granted, never get a grouch, never—"

The mayor interrupted her, his face serious as he said:

"There were Darry and Joan."

"But these are the days of divorce courts," she answered, "and—gen-

Do You Get Up With a Lame Back?

Kidney Trouble Makes You Miserable

Almost everyone knows of Dr. Kinner's Swamp-Root, the great kidney, liver and bladder remedy, because of its remarkable health restoring properties. Swamp-Root fulfills almost every wish in overcoming rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night.

Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble, it will be found just the remedy you need. It has been thoroughly tested in private practice, and has proved so successful that a special arrangement has been made by which all readers of this paper, who have not already tried it, may have a sample bottle sent free by mail, also a book telling more about Swamp-Root, and how to find out if you have kidney or bladder trouble.

When writing mention reading this generous offer in this paper and send your address to:

Dr. Kinner & Co., 1155 Broadway, Binghamton, N. Y.

uses—coloring.

"I am old-fashioned," he parried.

"I like to dream of home with the woman in it."

"I fear it is going to rain," evaded Miss Brooks, looking anxiously at the cloud-filled west. "Do you mind digging a bit, Mr. Bedight?"

"As the wife said to her husband when she wanted a sealskin," he taunted, returning to the mound.

She came and stood over him as he worked.

His spade struck something—and her excitement grew.

"Oh, I do hope it's a mound builder!" she cried excitedly.

The mayor grinned and kept digging. A clap of thunder pealed in the distance. As she turned apprehensively, the digger's spade pried up a long, rosy object.

"Here is your mound builder," he said soberly, raising the object upon his spade.

She gasped.

The man smiled.

"Oh!" from the woman.

"I am afraid," he breathed, softly, "it is exactly what it looks like—the tail of a cow!"

As she stood frowning at him, great drops of rain began to fall. He looked about hurriedly for shelter under a tree.

"Come on," he cried, starting for the boat upon the beach. "We'll have to camp out."

She followed him blindly.

He pulled the dory high and dry and tipped it keel up.

"Crawl under," he said as the rain began to fall in torrents.

"Why, Mr. Bedight, I can't do that!"

The man took her gently by the arm.

"You have no other choice—and besides, I'm not a cannibal!"

She stooped and sat down upon the sand under the shelter. He followed, sitting close to her, of necessity. The fury of the storm broke. The day became as dusk, lighted only by the

vivid flashes of anger that tore across the sky. He felt the woman tremble.

"I—I'm afraid," almost sobbing.

The mayor put his arm about her gently, soothing her as only a tactful man may soothe a nervous woman. Unconsciously she drew toward him.

"Lightning seems terrible," he said evenly, "but as a matter of fact there is always more danger on the cars. Statistics prove—"

"What's that?" cried the woman, apprehensively. "I heard a voice."

The mayor peered out.

"The sheriff!" he muttered under his breath.

Three men were running toward them on the beach, their heads down, ducking the rain.

Scrambling from under the boat, Mayor Bedight set off at top speed up the beach, pausing at the start long enough to whisper:

"I'll be back. Wait."

The sheriff and his two deputies, weathering the gale with lowered

eyes, had not seen the mayor's flight. In fact, so blinded were their eyes that they ran almost into the girl and the boat before they could stop.

"Hello!" bawled the sheriff. "You're from Squirell Inn, ain't ye? Where's yer beau?" hungrily. "We're lookin' fer him."

Miss Brooks drew her feet back under her skirt and replied coldly: "One of the best ways to find a man," witheringly, "is to go where he is."

The sheriff's chest shot out immediately.

"Now, look-a-here, young lady, none of your smartness or we'll take you along for accessory before the act. Understand?" blustering.

"You are wasting your time trying to bully me," replied the girl, without a tremor in her voice. "I am perfectly harmless and I have told you all I know. The man has gone up the beach."

"Aw, come on, Sid," broke in a slender young fellow, turning his back to the rain. "What the use of arguin' with th' gal? She ain't th' one we had th' day!"

Without a word the sheriff veered around the boat and, following the fast fading trail, set out in haste after Bedight. Fifteen minutes later the mayor came up from the opposite direction.

"I am sorry, Miss Brooks," he said, sorrowfully, "but I'm afraid you'll get wet after all. We've got to get away from here! I circled around and found the boat these fellows left. I set it adrift with a gale blowing it across the lake, but they are not far behind. We must get under way as soon as possible."

"I don't mind a soaking," replied the young woman, bravely. "It's the lightning that frightens me—and that's about quit."

The man righted the dory hurriedly, piled in their belongings and set the boat from the shore with a sturdy shove. A half mile below, on the beach, he caught sight of three men running toward them—and far away on the wave-whipped lake, a tiny dot of brown could be seen rising and falling as it scudded before the wind. It was the sheriff's row boat.

"Sleeping out of doors," said the mayor, smiling at the woman opposite, "is very beneficial to the lungs—especially on an island."

PAPER BAG COOKING

Great System Perfected by M. Soyer, Famous London Chef.

EXCELLENT FOR ALL FISH.

By Martha McCulloch Williams.

Cook fish by M. Soyer's paper bag method for several reasons. The first but not the best of them is to save smells. Experience has shown that the smell, though not absolutely prevented is so minimized as to be inoffensive.

The second reason is, the saving of time and trouble. There is absolutely no danger of scorching—all the watching necessary is a look in to see when the bag is brown enough to have the heat lessened. It takes from three to ten minutes—depending something on the weather, something on the fuel—especially if it is gas—and something on the grates or jets in which the burning goes forward. When the bag-corners turn a dead-leaf brown and the upper surface is faintly yellow, slack the heat—either by turning out flame, pushing in dampers, or setting the oven door ajar. It is this lowered heat that prevents the possibility of scorching—a prevention which anybody who has ever cooked will appreciate.

The last and greatest reason for the bag is the bettering of the fish itself. A paper bag will not make stale fish fresh, nor that which is coarse and savorless tasty. But given good fish, it will cook it to the queen's taste, turning it out tender, flaky, savorous, with all the goodness of the seasoning, or saucing driven through and through it.

SOME OF MY FAVORITE FISH RECIPES.

By Nicolas Soyer, Chef of Brooks' Club, London.

Cod Bourgeoise.—Take two slices of cod, season with salt and pepper, and lay them in a well-buttered bag. Place two mushrooms and two sliced tomatoes on top of the fish, add a chopped shallot, dot over with butter, squeeze over with lemon juice, seal up and cook for fifteen minutes.

Cod a la Valewska.—Take a cutlet, spread each side well with butter, dip into seasoned flour, then sprinkle very thickly with grated cheese. A mixture of Parmesan and Gruyere is best, but any kind, even Dutch, will do. Grease a bag well with butter. Put in the fish and add to it either a gill of good fish stock or flavored milk (i. e., milk in which a slice each of onion, turnip and carrot, and a bit of celery, have simmered for fifteen minutes). Seal bag and cook twenty to thirty minutes, according to the thickness of the cutlet, in a moderately hot oven. Turn out gently on to a hot dish. Pour the sauce over, sprinkle flaked shrimps on top, and serve. The shrimps should be made hot, not cooked, in a little roll of well-greased paper bag, separately.

Halibut a la Minute.—Season a slice of halibut about an inch thick with salt and pepper and roll in flour. Slice two tomatoes, lay them over the fish, squeeze lemon juice upon them, dot with bits of butter rather thickly, put into a thickly buttered bag, and cook fifteen minutes in a very hot oven. If the oven heat has to be slackened, cook for ten minutes longer—fish requires always to be well done.

Cod.—Slice three pounds of fish, season well with salt and pepper, add a small onion chopped, and a few sweet herbs. Mix to a smooth paste an ounce of butter or beef dripping, a large tablespoonful of flour, and three parts of a glass of milk. Any sauce can be used to flavor the paste, though none is necessary. Put the paste and the fish together into a well buttered paper bag, seal tight, and cook in a hot oven twenty minutes.

Stewed Eels.—Cut two eels in pieces two inches long. Add salt and pepper, chopped parsley, a small onion chopped, a teaspoonful of flour, and a pinch of sweet herbs. Put into a greased bag with two spoonfuls of milk, water, or stock, or either of them mixed half and half. Butter makes the dish much richer, but can be left out. Cook twenty minutes in a moderate oven and serve from the bag or a very hot dish.

Smoked Haddock.—Clean a smoked haddock weighing about two pounds, season it well with cayenne pepper, but no salt. Pour upon it two large tablespoonfuls of milk and a little white sauce. Sprinkle with Parmesan cheese and a few bread crumbs. Add enough melted butter to moisten the crumbs, put the fish in a well-buttered bag, seal, and cook for twenty minutes in a very hot oven.

Stuffed Fresh Haddock.—Cop a cooked onion with three tablespoonfuls of breadcrumbs. Add an ounce of butter, salt and pepper to taste, a little chopped parsley and a beaten egg. Mix thoroughly, stuff the fish with the mixture, tie up, roll in flour, place in a bag well greased, dot the fish over with butter, seal the bag, and cook for twenty minutes in a hot oven.

Fish Croquettes.—Mix one pound of cold fish, free of the skin and bone, with two tablespoonfuls of white sauce and season well with salt, pepper, cayenne, and a little chopped parsley. Form into croquettes, roll them in eggs and breadcrumbs, place in a well-greased bag, seal and cook for twenty minutes in a very hot oven.

BOYS' HANDICRAFT

By A. NEELY HALL

Author of "Handicraft for Handy Boys" and "The Boy Craftsman"

A TAILLESS KITE.

The tailless kite shown in Fig. 1, known as the Malay, is one of the simplest forms to make, and it is such a big improvement over the hexagonal kites. Its advantages are many. It is that it has become the most popular type among boys who make their own kites. Its advantages are many. It is a very steady flier, it will fly in a light breeze, it has good lifting qualities for sending up flags and banners on its line, and with no tail to hamper it there is little danger of it getting caught in trees, on telegraph wires, and on chimneys. It is safe to say that fifty per cent. of kites with tails are lost through the entanglement of the tails.

Three feet is a good length for a medium-sized kite. Spruce is the best material for the sticks, but any soft straight-grained wood will serve the purpose. Cut the two sticks of equal length, and make them thin and wide, rather than narrow and thick, as shown in Fig. 6.

Fig. 3 shows the bow stick with the bow-string attached. Cut a notch in the stick near each end to hold the ends of the bow-string, as shown in Fig. 4. The proper bend for the bow stick is 1-10 of the length of the stick, plus 1/2 of that measurement, which will be a trifle more than 1-7 of the length of the stick, as marked upon Fig. 3.

The center of the length of the bow stick must also be its center of balance, and this must be determined and any necessary correction made before fastening the bow stick to the vertical stick. Test the bow stick by balancing it at its center upon the back of your knife blade.

Secure the bow stick to the vertical stick with brads and thread at a distance from the top of the vertical stick equal to 1-10 of its length, as shown in Fig. 5. The ends of the sticks may be notched to receive the framing string, but you will get better

results if you drive a carpet tack into each end and tie the string to these (Fig. 7). With the string tied securely there will be no chance for the sticks to twist out of position.

A light-weight wrapping paper, or a heavy tissue-paper should be used for covering the kite framework. The strong, light weight, brown paper, now so generally used for wrapping-paper makes an excellent covering. Lap the edges of the paper, and paste in the same way in which you would put on the covering of any kite, but instead of stretching it tight allow it to have a little fullness. As you will see by Fig. 2, the paper goes on the outer face of the bow stick.

Attach the belly-band at the intersection of the sticks and at the lower end of the vertical stick, as shown in Fig. 2, and make it of the proper length so when held to one side it will reach to the point A (Fig. 5). Tie the kite string securely at this point.

The Malay kite is a strong puller, so it is important to procure a tough twine with which to fly it. Fig. 8 shows a good form of string reel that is easily made. Cut the two upright pieces about 6 inches long, and bevel the ends (Fig. 9), then make the two holes for the crosspieces, boring them through the two pieces at one time to get them opposite one another. Use old chair rounds, flag-sticks, dowel-sticks, or sticks whittled to about 1/2

inch in diameter, for the crosspieces. The uprights should be fastened about 4 inches apart. Drive nails through the edge of each upright into the crosspieces to hold the reel together. The projecting ends of the crosspieces form the handles of the reel. One is held in each hand and the reel is turned with sort of a hand over hand movement. Such a reel as this can be operated more handily and more rapidly than the common variety of reels.

MANY VARIETIES OF SHELLS

There Are 50,000 of Them in the Smithsonian Institution Collection.

Shell life is probably the oldest form of animal life upon the globe. Its study is an interesting one, and even people who are not of a scientific turn of mind find pleasure in looking on the exquisite coloring and delicate beauty of the many varieties of shells and on their wonderful mechanism.

There is nothing which more delights children than to wander along the seashore and gather the little shells which have been washed on the beach by the restless waves. And then, too, when some large specimen is found, with what eagerness the finder, whether young or old, will apply it to his or her ear and hear from within its murmurings, whereby, in the words of the poet, it expresses "mysterious union with its native sea."

In the Smithsonian Institution at Washington there is a collection of 50,000 shells, many of them of a large size, others strangely formed, and some of the iridescent colors which rival the hues of sunset.

In examining these there come to mind many fables and traditions about shells. There is the conch shell, which was made into a horn and blown by old Triton and the attendants of Neptune. Then there is the nautilus, of which Pope says:

Learn of the little nautilus to sail,
Spread the thin oar and catch the driving gale.

Many years ago a Dutch naturalist went to the Indian seas to study shells. When he came back he told the story that the nautilus sailed in troops over the sea, and were able, when they wished, to fill themselves with water and sink to the bottom.

This, it has been found, is not true. The nautilus commonly inhabits the bottom of the sea, where it creeps about by means of a large muscular disk with which the head is furnished, and it rarely rises to the surface or is seen floating there. The interior of the shell is divided into chambers, connected by a little tube, which affords air. The shell has most exquisite coloring, from pearly white to varied motley.—San Francisco Call.

Conquering Grief.

The world endures its grief and sorrow with stern and stoical temper. It soon gets over the first severe shock of great catastrophes, even those costing many lives. It is charged with growing callous to bruises. But that charge, it seems to us, comes a little wide of the mark.

What if the world did not quickly recover from its sorrows? What if people gave in under the weight of every grief that came crushing down upon them? They would soon have no strength to endure, no power to resist; they would become mentally and spiritually emaciated. This recuperative force we display is not indifference, not unfeeling; it is a sort of heroism, a philosophy that makes man stronger than his most powerful adversary, makes him equal to the crisis, no matter what it may be.

But in a superficial sense, take the train of disasters that go stalking before us and imagine our giving away before any single one, whether it be devastating flood, earthquake or the Titanic tragedy at sea, and what a lugubrious race we would soon become to stay and weep at the tomb of our sorrows.—Omaha Bee.

Fatal Irresolution.

Irresolution is a worse vice than rashness. He that shoots best may sometimes miss the mark; but he that shoots not at all can never hit it. Irresolution loosens all the joints of a state; like an ague it shakes not this nor that limb, but all the body is all once in a fit. The irresolute man is lifted from one place to another; so hatched nothing, but addles all his actions.—Feltham.

MR. WOODROW WILSON.

Wife of the Democratic Presidential Nominee. Honorary President of the Woman's National Democratic League.

Mrs. Woodrow Wilson, wife of the new leader of Democracy and probable next mistress of the White House, is perhaps the most interesting woman in the United States today. This is inevitable—not because she wishes it, for she does not—and is as firm as a rock in her conviction that being the wife of a public man does not necessitate nor call for a woman's becoming a publicity seeker. She successfully resisted all appeals of photographers and interviewers until Mr. Wilson's nomination as Democratic candidate for the presidency was an fait accompli. This modesty is easily traced to her southern ancestry and training and is characteristic also of her distinguished husband.

She was born Ellen Louise Axson, daughter of a Presbyterian divine of Savannah, Ga., whose family, so far as he knows, is the only one of the name in America.

Like Mr. Wilson, she has one brother and one sister living, all in the same literary circle as the doctor and herself.

In this atmosphere of learning Mrs. Wilson could hardly be expected to be other than she is—widely read, broadminded and charitable, devoted to her home and the principles for which it stands.

She has marked ability as an artist, and it is said that a portrait painter of ability was spoiled when she married the young barrister who had then given up the practice of his profession to specialize on the subject that has made him a presidential nominee.

Mrs. Wilson's three daughters—Misses Margaret Woodrow Wilson, Jessie Woodrow Wilson and Eleanor Randolph Wilson—possess the mental characteristics of their father and their mother's artistic temperament, combined in such a way as to give zest to every moment of their lives and protection from the foibles of the world. They form, indeed, an ideal family circle, one that it would be well for every American household to emulate.

FEEDING HOGS FOR PROFIT

By W. J. Owen & Son

For Farmers Home Journal

We realize that this article will be read by admirers of all the leading breeds of hogs and to all we say that it is not our object to "advertise" our choice of breeds but to give a few facts and figures that may be of help to beginners in hog feeding. Of course, we know that we are not as good feeders as many breeders but we have had fair success and if it will profit any one he is more than welcome.

Only a few days ago we passed a farm and saw some little non-descript hogs in a pen and from appearances the young man was trying to fatten his hogs on fodder, good for bedding but rather a slim diet for fattening hogs. Of course, this man gives some water and corn with the fodder but he will feed up a considerable portion of his corn crop before his hogs will be well fattened. In contrast to this method we know another party who weighed a hog on Monday, hog weighed 150 lbs. and Saturday at noon the hog weighed 165 lbs. or a gain of 15 lbs. per day and hog was not intentionally fed for rapid gain. This hog was fed a slop of shorts with all the corn he would eat and had an occasional bunch of cow peas as a relish.

Another bunch fed by same party made a gain of 1 1/2 lbs. per day with same feed except they had coarse bran instead of shorts and were not fed as much corn. Last fall a neighbor had a bunch of pigs to make a gain of 30 lbs. to each hog in 13 days on cow peas alone but would have done better on a mixed diet we feel sure.

We believe the good feeders all

will agree that nothing short of 2 to 3 lbs. per day is a profitable gain for fattening hogs for market and after the hogs get started or on full feed this easily made providing the hogs are in healthy condition and are large enough to be profitable feeders.

We sell more hogs for breeding purposes than porkers and, of course, we do not aim to grow our breeding hogs so rapidly but aim to keep them growing steadily on pasture and feed some corn and a slop of middlings at least once a day. A few days ago we saw a man drive 14 head of hogs to our station and the bunch brought him something like \$275, and we feel sure it would be hard to convince this man that there is no money in hog feeding. Of course, it takes time and attention to make hog raising and feeding profitable but where is the business that can be made a success without work and where the business that requires so small an investment in actual cash for a start as the hog business?

Good healthy stock, plenty of grass and clover and an industrious feeder on the farm and a buyer offering to take your finished products at 9 cents per, makes a winning combination.

Gone Before.

"The flowers are dead that made a summer splendor
By wayside nooks and on the sunny hill,
And with regrets these hearts of ours grow tender
As sometimes all hearts will.
"One little hour of almost perfect pleasure,
A foretaste of happiness to come,
The sudden frost the garden yields its treasure
And stands in sorrow dumb.
"Oh, listen heart! The flower may lose its glory
Beneath the touch of frost, but does not die.

In spring it will repeat the old sweet story
Of God's dear love by and by.
"In heaven, if never here, the hopes we cherish,
The flowers of human love we count as lost,
Will live again, such beauty cannot perish,
And heaven knows no frost."

THIRD TERMER'S JOKE ON LABOR

Brandels Shows Right to Organize Is Not Recognized.

THE PLATFORM IS SILENT.

Noted Lawyer Exposes the Flimsiness of Promises Made to Workingmen by Perkins and His Candidate, Who Stands For Private Monopoly.

"The new party pledges itself to social and industrial justice and specifically to 'work unceasingly for effective legislation looking to the prevention of occupational diseases, overwork, involuntary unemployment and other injurious effects incident to modern industry, . . . but nowhere in that long and comprehensive platform . . . can there be found one word approving the fundamental right of labor to organize or even recognizing this right without which all other grunts and concessions for improvement of the condition of the workingman are futile. The platform promises social and industrial justice, but does not promise industrial democracy. The justice which it offers is that which the benevolent and wise corporation is prone to administer through its welfare department. There is no promise of that justice which free American workingmen are striving to secure for themselves through organization. Indeed, the industrial policy advocated by the new party would result in the denial of labor's right to organize."

"The new party stands for the perpetuation and extension of private monopoly in industry—that private monopoly from which the few have ever profited at the expense of the many and for the dethronement of which the people have, in the past, fought so many valiant battles. That cursed product of despotism, the new party, proposes to domesticate in our republic, proclaiming: 'We do not fear commercial power.' Certainly organized labor has had experience with the great trusts which should teach all men that commercial power may be so great that it is the part of wisdom to fear it."

The above declaration was made by Louis D. Brandels before the convention of the American Federation of Labor, Massachusetts state branch, at Pittsburg, Sept. 18.

Of Supreme Importance.
He urges a careful study of the new party platform, particularly its effect upon labor, noting not only WHAT IT CONTAINS, but WHAT IT OMITTS, adding, "When you make that examination you will find that there is a significant omission and that this skillfully devised platform TAKES FROM LABOR MORE THAN IT GIVES."

Labor Record of Trusts.
Mr. Brandels then lays bare the labor record of the trusts, declaring that "great trusts—the steel trust, the sugar trust, the beef trust, the tobacco trust, the smelter trust and a whole troop of lesser trusts—have made the extermination of organized labor from their factories the very foundation stone of their labor policy. The ability to defeat labor's right to combine seems to have been regarded by the trust magnates as a proper test of the efficiency of their capitalistic combination."

Mr. Brandels shows that in 1899, during the Colorado smelters' strike, the American Smelting and Refining company closed its mills where the strikers had been employed and transferred the work to other mills, thus breaking the strike. The United States Steel corporation had similar success in 1901 with the Amalgamated Association of Iron and Steel Workers. And the association been dealing with competing employers the result would have been different. The United States Steel trust was prompt in introducing this plan. June 17, 1901, six weeks after it began its operation, its executive committee passed this vote, which was offered by Charles Steele, a partner of George W. Perkins in the firm of J. P. Morgan & Co.:

"That we are unalterably opposed to any extension of union labor and advise subsidiary companies to take firm position when these questions come up and say that they are not going to recognize it—that is, any extension of union in mills where they do not now exist."

Union Men Not Wanted.
The result was that the bulk of American union laboring men in the iron and steel industry were made to understand that they were not wanted at the works of the United States Steel corporation. Places once filled by American laborers loyal to their union were given to others, and, as the Stanley committee found, "Hordes of laborers from southern Europe poured into the United States." . . . Hence about 80 per cent of the unskilled laborers in the iron and steel business are foreigners of these classes, the profits going to the steel corporation. Mr. Brandels declared that "the immediate and continuing result of the steel trust's triumph over organized labor has been an extensive system of espionage and repression."

There has been no disturbance of business interests during this presidential campaign. Why? Confidence in the integrity of the Democratic nominees and right purposes of the party.

TWO BIG ISSUES, SAYS COLLIER'S

The Tariff and the Proper Treatment of Monopolies.

WON'T TIE TO ROOSEVELT.

"Actively Disagrees" With His Views About Trusts and "Wastes of Competition" and Supports the Candidacy of Wilson and Marshall.

Collier's is out for Wilson and Marshall. It refuses to support Theodore Roosevelt, plus George W. Perkins, Elbridge H. Gary and the rest of the steel trust-harvester trust magnates.

Its open opposition to the third term ticket was indicated in the issue of Sept. 14. In the issue of Sept. 21 its reasons for espousing the Democratic cause are clear and forceful.

The leading editorial, "The Wastes of Competition," says:

"More and more the campaign is coming down to two pressing issues, the tariff and the proper treatment of monopolies. Collier's actively disagrees with the view of monopoly being urged by Messrs. Roosevelt, Perkins and Gary.

"They talk a great deal about the wastes of competition. The necessary wastes of competition are relatively insignificant, and the wastes of unfair and destructive competition are wholly unnecessary. They will be largely eliminated when competition is regulated."

"The La Follette-Leaenroot and the Stanley bills to perfect the Sherman law and the Newlands-Cummins proposals for an interstate trade commission are all directed in part to that end. The remaining wastes of competition may be likened to the wastes of democracy. These are obvious, but we know also that democracy has compensations which render it more efficient than absolutism. So it is in industry. The margin between what men naturally do and what they can do is so great that the system which urges men on to effort is the best system."

"The necessary wastes of monopoly, on the other hand, are enormous. Some of these can, of course, be eliminated by regulation. An efficient interstate trade commission, acting under appropriate legislation, could put an end to much of the oppression of which trusts have been guilty. It could prevent unjust discrimination. It could prevent ruthless and unfair use of power; but a government commission would be powerless to secure for the people the low prices commonly attendant upon competition."

"As no means exist for determining whether greater net earnings are due to greater efficiency in management or to excessive profits, large net earnings would be followed by compulsory reduction of prices, which in turn would create a sense of injustice suffered, paralyze individual enterprise and produce unprogressive, slipshod management. The attempt to secure low prices through price fixing would prove as impotent as the statutes which have sought to protect the public in railroad rates by limiting the dividends."

"The interstate commerce commission has been invoked as an argument in favor of licensing monopoly. That commission has stopped many abuses; it has practically put an end to corrupt and corrupting discrimination in rates; it has protected the shipper from oppression and arrogance and injustice; it has prevented unreasonable advances in rates; but it has secured comparatively few notable reductions in rates, except those involved in stopping discrimination between persons, places or articles. It has been powerless to reduce operating costs, and greater reductions in rates can come only with reductions in the cost of producing transportation. The injustice and corruption attending the earlier railroad period were extremely serious. But we must not forget that the sweeping reductions in American operating costs and rates belong to the earlier period of competition among railroads. In the ten years from 1889 to 1899, while competition among the railroads was active, the freight rate per ton per mile was gradually reduced from .041 to .024. The years 1899-1900 marked the great movement for combination or 'community of interest' in the railroad world as well as in the industrial world. The freight rate per ton per mile began to rise. In each of the eleven succeeding years it was higher than in 1899, and in 1910 it was .033.

"The deadening effect of monopoly is illustrated by its arrest of invention. The shoe machinery trust, formed in 1899, resulted in combining, directly and indirectly, more than 100 shoe machinery concerns. It acquired substantially a monopoly of all the essential machinery used in bottoming boots and shoes, as well as many other machines. It believed itself unassailable, and shoe manufacturers had come to regard their subjection to the trust as unavoidable. Nevertheless in 1910 the trust found its prestige suddenly threatened and its huge profits imperiled. It was confronted with a competitor so formidable that the trust, in flagrant violation of law, paid \$5,000,000 to buy him out. Thomas G. Plant had actually succeeded in developing in about five years, while the trust was stolid from monopoly, a
